Jean François Fusco,

Pharmaceutical General Manager, FM HEALTH

Chairman, EALTH (European Association for Logistics and Transport in Healthcare)

Doctor in Pharmacy plus business school, Jean-François has spent 10 years in a pharmaceutical company as Supply Chain Manager and Deputy Pharmacist/Qualified Person. After 4 years in merchant banking as responsible for a portfolio of subsidiaries and participations, he started a career in the Healthcare LSP with different positions: Operations Director, Project Director, and since 2008 Europe Pharmaceutical General Director for FM Health covering the functions of QP for France and Switzerland and assuring the healthcare compliance at corporate level. As a responsive leader he developed operative and innovative solutions with a view to participating efficiently to market needs and evolutions. Participating to the profession development and representation he's the President of the French depositaries organization LOGSanté. In 2010 he collaborated to the creation and was elected Chairman of EALTH the European Association for Logistics and Transport in Healthcare which represents the logistics and dedicated transport service providers to the European Institutions and Organizations.

Thierry Moreno

Founder of NV Logistics

After working 20 years for the forwarding industry (DHL, Ziegler group), Thierry founded NV Log SA in 2010. NV Log started on early days as specialized in cross-trade transport and offered many logistics solution to your needs with a strong partner global network. Mid of 2011, Thierry started to create a speciality department dedicated to Life Sciences industry logistics. This service has been named “Vital Logistics”. This very demanding industry requests highest quality standards for assuring cold supply chain integrity during the transport legs by air, road or ocean. Vital Logistics started in September 2011 to implement a quality policy that complies with the latest GDP standards and was awarded Wholesaler Swissmedic Authorisation since February 2nd.

Alexandre Rieucan

Health and cosmetics sectors, GS1 France

Alexandre Rieucan is graduated with a Master’s of Management from Telecom Business School ParisTech and has been working with GS1 France since 2009. He has dedicated his legal knowledge and his expertise in new technologies for traceability and information sharing to various industry fields in France: fast-moving consumers goods (FMCG), transport and selective distribution of cosmetics. Because of recent new regulations in Europe and in the world, he is now in charge of helping health and cosmetic sectors to adopt the same logistical good practices through the lead of European and global working groups, gathering GS1 bureaus, suppliers and retailers.

Leif Krönkvist
